

BUD FORK

The strong points of this monofork are its high moment of inertia and its relatively small size. With only 140 mm thickness, it can pick up a 2000 Kg load in double depth alone, despite the small bending and the high work pace it can reach. It's very useful in all those situations where there's no room for a typical pair of forks and where the load to handle is else than the normal europallet.

PRODUCT CODE	Q LOAD (KG)	L FIXED BODY LENGTH (MM)	Ls UPPER SLIDE LENGTH (MM)	S2 STROKE (MM)	MAX BENDING UNDER LOAD (MM)
BD140-130	1000	1300	1300	2650	19
BD140-140		1400	1400	2850	22
BD140-150		1500	1500	3050	26
BD140-160		1600	1600	3250	30
BD140-170		1700	1700	3450	35
BD140-180		1800	1800	3650	41
BD140-200		2000	2000	3900	46

A benefit deriving from the single-engine arrangement is the simple and conventional operation.
